**BillingPlatform Digital Commerce**

Capitalizing on the Surge in B2B e-Commerce

According to Forrester, US B2B e-commerce is expected to reach $1.8 trillion by 2023, up more than 60% from 2018. To capitalize on this recent surge in B2B e-commerce, enterprises who have yet to tackle digital transformation are now searching for solutions to offer customers a self-service buying and billing experience and electronic payment options.

BillingPlatform offers a complete cloud-based, secure solution to meet these needs. From an online product catalog and configuration management, to billing and invoicing through to digital payment enablement, BillingPlatform is able to support the the e-commerce customer lifecycle. This seamless billing and payment experience is supported with highly configurable e-commerce pages that include payment acceptance and processing delivered directly from third party PCI-validated service providers.

BillingPlatform has a proven track record of helping enterprises enable payments quickly and securely.

✔ Embed hosted payment pages in any checkout page to capture electronic payments for purchases

✔ Real-time calculation of sales tax on shopping cart ensures correct upfront payment amount

✔ Manage multiple stored payment methods

✔ Fully brandable to match a company's look and feel

✔ Removes PCI burden for merchants and ensures compliance

As the industry leading cloud-based billing and revenue management solution, BillingPlatform provides full lifecycle support of the monetization process – from data management, product setup, quoting, billing and invoicing, revenue recognition, through payment and collections – all on a secure, next-generation cloud platform. The unparalleled flexibility of the platform puts enterprises in control of how they differentiate in the market, maximize profitability, reduce operational costs and improve the customer experience.
